

# II Darwin's Legacy Tea Party

“Endless forms most beautiful and most wonderful”

April 18<sup>th</sup>

14:00h, 8.2.47

## Debate

Publish or perish? Open access?  
Depression in academia?

“How to make better  
science and Science  
better?”

with

**Andreia Santos** Psychology

**Davide Nunes** Informatic Engineering

**Francisco Pina-Martins** Bioinformatics  
& **You!**

## Talks and Tea!

- The construction and persistence of myths regarding Darwin's life & the history of Darwinism by **Pedro Fonseca** (CEIS20)
- The birds and the seeds: how to make species, Darwin-style by **Martim Melo** (CiBio)
- Darwin & the barnacles, and the story of the stalked barnacle he didn't see by **Teresa Cruz** (MARE)
- Brontosaurus and Darwin's pigeons: variability explains it all by **Emanuel Tschopp** (UniTo)
- Acoustic communication: from the origin of species to the conservation of biodiversity by **Paula Simões** (cE3c)
- “Curiously parallel”: storytelling and phylogenetics by **Sara Silva** (IELT - FCSH/UNL)
