

cE3c Advanced Courses 2020/2021

Soil ecology and ecosystem services

Taught by: Teresa Dias & Cristina Cruz | **January 25-29, 2021 @ FCUL**

Note: This course is intended to be presential, but if needed (e.g. due to COVID-19 security measures by the time of the course) it may be adapted to be given remotely

Objectives

This course is conceived to give an integrated view of the living component of soils, and its key role on ecosystem functions and processes. Therefore, the course will assess the link between soil biological diversity and ecosystem functions. The course will have the participation of some of the most relevant specialists in the field and will enable an 'hands on' approach to the study of soil biology and ecology. It will include both theoretical and practical (laboratory and desk) classes oriented in a problem solving perspective.

Deadline for applications: December 28, 2020

The course is free for a maximum of 10 1st year PhD students in Doctoral programmes at FCUL (e.g. Biology), Biodiversity, Genetics and Evolution (BIODIV UL, UP) and Biology and Ecology of Global Changes (BEAG UL, UA). For information of fees for other participants see the programme details.
