

cE3c Advanced Courses 2020/2021

Bioinformatics analysis of biological sequences — from sequence to structure

Taught by: Teresa Nogueira, Rita Ponce & Eva Pinho | July 19-23, 2021 @ FCUL

Note: This course is intended to be presential, but if needed (e.g. due to COVID-19 security measures by the time of the course) it may be adapted to be given remotely

Objectives: Acquire knowledge regarding bioinformatic tools available to predict nucleic acid (RNA, DNA or Nucleic Acids Mimics) and protein three-dimensional structure, as well as autonomy and critical thinking in the use of those tools. Develop skills on the use of bioinformatics software freely available on the Internet and to interpret the biological meaning of the results.

Deadline for applications: June 11, 2021

The course is free for a maximum of 8 1st year PhD students in Doctoral programmes at FCUL (e.g. Biology), Biodiversity, Genetics and Evolution (BIODIV UL, UP) and Biology and Ecology of Global Changes (BEAG UL, UA). For information of fees for other participants see the programme details.

See the PROGRAMME, how to apply and fees at:
