

cE3c Advanced Courses 2021/2022

Island Biogeography

Taught by: Ana M. C. Santos *et al.* | April 4-8, 2022 @ FCUL

This course will only take place if possible in presential format

Objectives

This course covers the main aspects of island biogeography, and on completion of the course the students shall have acquired knowledge and understanding on: 1) Ecological/evolutionary theories developed from studies on islands, and its applications in other research areas; 2) Processes that occur during and after island colonization, that shape island communities; 3) Island evolutionary processes; 4) Applications of island biogeography to conservation biology.

Deadline for applications: March 4, 2022

The course is free for a maximum of 10 1st year PhD students in Doctoral programmes at FCUL (e.g. Biology), Biodiversity, Genetics and Evolution (BIODIV UL, UP), Biology and Ecology of Global Changes (BEAG UL, UA) and Sustainability Science. For information of fees for other participants see the programme details.
